Lucknow, Uttar Pradesh, India

I am a Full Stack Developer with over 4 years of experience building high-performance, scalable web applications. Expert in developing complex front-end interfaces and robust back-end systems, optimising page load times, and enhancing user engagement. Skilled in responsive design, clean and efficient coding, and translating user requirements into intuitive, feature-rich solutions. A dependable team player with a proven track record of delivering projects on time. Passionate about leveraging emerging technologies to drive business growth and improve user experiences. Actively seeking opportunities to create cutting-edge digital solutions that elevate user satisfaction

PROFESSIONAL EXPERIENCE

Delightree (San Francisco, California)
Senior software engineer (Remote)

November 2024 - Present

At Delightree, I contributed to platform growth by improving feature delivery, code quality, and cross-team efficiency. I played a key role in modernizing the frontend architecture, building customer-facing improvements, and strengthening the bridge between support and engineering teams. By proactively identifying UX gaps and driving process improvements, I helped boost product reliability and team productivity.

Accomplishments:

- Refactored a legacy codebase to eliminate prop drilling, introducing a shared state-management architecture that significantly improved scalability and maintainability.
- Designed and implemented an in-platform error-resolution flow that reduced customer drop-off and was recognized by the product team.
- Delivered multiple major product features across several quarters while maintaining 100% on-time delivery, even while juggling support responsibilities and ad-hoc requests.
- Built a structured cross-team support process bridging customer support and engineering, leading to faster issue response and resolution times.
- Conducted technical interviews for senior engineering roles and led new-hire onboarding, improving ramp-up speed through structured feedback.
- Upskilled in modern AI tools and applied them to build internal developer tooling, improving workflow efficiency across the engineering team

Sheetsway (San Gwann, Malta)
Full Stack Developer (Remote)

May 2023 - November 2024

At Sheetsway, I led the platform's growth by enhancing user adoption and operational efficiency. I played a key role in developing core functionalities, optimizing backend performance, and improving scalability. By creating user-friendly interfaces, I boosted engagement and reduced user friction, contributing to Sheetsway's achievement of key business milestones

Accomplishments:

- Worked on AI wrappers to make the whole platform AI native.
- Made the platform AI ready so anything can be done with a single click
- Led the development of highly responsive, visually appealing web products tailored to the audit industry, enhancing user satisfaction and engagement.
- Delivered a web product with an average page load time under 3 seconds, improving user experience and reducing bounce rates by over 4%.
- Implemented intuitive navigation and user-friendly UI/UX elements, driving a 10% increase in user engagement and a 5% decrease in user errors during audit processes.
- Optimized backend code, significantly reducing data load across the software, contributing to enhanced performance and efficiency.
- As a core team member, played a pivotal role in scaling the software, leading to a valuation of \$15 million USD.
- Led the development of company websites, ensuring a seamless blend of performance, aesthetics, and functionality.

Elpha AI (Gurgaon, India)
Full Stack Engineer (Remote)

November 2022 - May 2023

Engineered visually striking and user-centric web products for AI-driven projects, ensuring a blend of functionality and aesthetics. Collaborated with cross-functional teams to deliver seamless integration of AI features, contributing to the success of company websites and AI innovations.

Accomplishments:

- Developed highly responsive, user-friendly, and visually appealing web products for AI-driven projects, enhancing user experience.
- Implemented intuitive UI/UX designs, driving increased user engagement and satisfaction.
- Collaborated effectively with cross-functional teams, ensuring the seamless integration of advanced AI features and functionalities.
- Contributed to the creation and continuous enhancement of company websites, aligning design and functionality with evolving business needs.

LA Technologies (Banglore, India)

Web Developer (Remote)

March 2022 - November 2022

As a Full Stack Developer at LA Tech, I bridge the gap between clients and the company, aligning solutions with client needs. I translate client objectives into actionable plans, ensuring clear communication and delivering high-quality, user-centric results.

SKILLS AND EXPERTISE

Frontend Skills:

- Experience: Extensive in frontend development.
- Languages and Frameworks: JavaScript, HTML, CSS, Next.js, TypeScript, React.
- Modern Libraries and Tools: Schadn, Mantine, Tailwind CSS.
- Expertise in creating visually appealing and responsive user interfaces.
- Ensuring cross-browser compatibility.
- Implementing intuitive UI/UX designs to enhance user engagement and satisfaction.

Backend Skills:

- Languages and Technologies: Node.js, Express, Firebase, Firestore, Supabase, Median in Python, GraphQL, SQL.
- Designing and maintaining robust, scalable server-side applications.
- API development.
- Server optimization.
- Database management.
- Ensuring seamless data flow and integration with frontend components.
- Contributing to efficient, secure, and high-performance systems.

Version Control:

- Tools: Git, GitHub
- Managing and tracking code changes effectively.
- Leveraging branching strategies, pull requests, and code reviews.
- Ensuring smooth collaboration within development teams.
- Maintaining code integrity, resolving conflicts, and streamlining the development workflow.

EDUCATION

Chandigarh University (Chandigarh, India)	2021-2024
B.E - CSE (Bachelor of Engineering in Computer Science Engineering)	
NIT Longowal (Longowal, India)	2018-2021
Diploma - CSE (Diploma in Computer Science Engineering)	
Spring Dale College (Lucknow, India)	2012-2018
Matricution
